- ✓ Automatically adjusts display backlight brightness
- ✓ 4.7 in. High Definition (1280 x 720) Display; exceptionally bright, outdoor viewable; optically bonded to touch panel

When it comes to use and abuse and demanding environmental conditions, the TC72 is at the top of its class. Built to handle 8 ft./2.4 m drops to concrete and 2,000 tumbles, with IP65 and IP68 sealing, this device is virtually waterproof, drop-proof, dust-proof and tumble-proof — workers can drop it, use it outdoors in the rain, snow, freezing cold or sweltering heat and still expect reliable operation. And the Corning Gorilla Glass touch panel and imager window bring maximum scratch-resistance and shatter-proofing to two of the most vulnerable device features — the display and lens eye.
